Pallabi Das

Frontend Developer

Kolkata,West Bengal | 9434826829 | pd7727772@gmail.com

Summary

Frontend Developer with 3+ years of experience in responsive web design. Skilled in converting Figma designs into pixel-perfect HTML/CSS and building interactive user interfaces. Recently upskilled in React JS and TypeScript with hands-on experience in real-world projects using hooks, reusable components, state management, and API integration. Strong knowledge of JavaScript (ES6+), TypeScript, REST APIs, Git, and modern frontend development practices. Passionate about building scalable, maintainable, and user-friendly web applications.

Skills

- **Frontend:** HTML5,CSS3,JavaScript(ES6+), TypeScript,React Js
- **React & TypeScript:** Hooks, Components, Props, State, Redux Toolkit, Firebase / Authentication, Type Safety
- **Styling:** Tailwind CSS, Bootstrap, Flexbox, Grid
- **API Integration:** REST APIs,Fetch,Axios
- **Tools:** Git,GitHub,VS Code

Work Experience

Frontend Developer | Wordsys Information Technology **(2022 – 2025)**

- Converted Figma designs into pixel-perfect HTML/CSS
- Developed responsive layouts for multiple devices
- Implemented animations, transitions, and UI effects
- Collaborated with teams for design consistency
- Fixed UI issues during testing phase
- Worked on multiple live projects and mockups for different clients

Project

Weather App – weather-website89.netlify.app
Tech Stack: React.js, JavaScript (ES6+), REST API, Framer Motion, CSS3, LocalStorage, Geolocation API
Developed an **advanced weather application** using **React.js** with **real-time data fetching** and **interactive UI**. Implemented **city-based search** with **auto-suggestions**, **error handling**, and **geolocation-based automatic detection**. Displayed current weather details including **temperature**, **humidity**, **wind speed**, and **"feels like" conditions** along with **dynamic weather icons**. Added features like **search history** and **favorite cities** using **localStorage** for persistence. Implemented **unit conversion (°C/°F)** and **debounced search** for **performance optimization**.Enhanced user experience with **dark/light mode toggle**, **glassmorphism UI**, **dynamic backgrounds** based on weather conditions, and smooth **animations (Framer Motion)**. Designed a fully **responsive layout** for **mobile and desktop devices**.

.

TaskManager App- https://taskmanager2906.netlify.app/
Tech Stack: React.js, JavaScript (ES6), HTML5, CSS3, LocalStorage, react-beautiful-dnd, Context API
Developed a dynamic task management application using **React.js** for efficient task tracking and organization. Implemented **CRUD operations** (Add, Edit, Delete tasks) with real-time UI updates. Designed a **Kanban-style board** with three columns: *To Do, In Progress, Done*. Integrated **drag-and-drop functionality** using libraries like **react-beautiful-dnd** for seamless task movement. Managed global state using **Context API** to efficiently share data across components. Enabled **data persistence** using **localStorage** to retain tasks across sessions. Added advanced features like **task search, labels/tags, priority levels, and due dates**.

Video Platform-https://youtube-29.netlify.app/
Tech Stack: React.js, JavaScript (ES6+), HTML5, Redux Toolkit, React Router, YouTube Data API, LocalStorage
Developed a YouTube-inspired video streaming platform using React.js and **Redux Toolkit** with features like **search**, **video playback**, **authentication**, **watch history**, **comments**, **likes**, **category filtering**. Integrated external APIs and built a fully responsive UI.

Education

M.Tech in Electronics and Communication Engineering
Kalyani Government Engineering College (2020–2022)

B.Tech in Electronics and Communication Engineering
Brainware Group of Institutions (2016–2020)
