- Designed and implemented RESTful API endpoints with JWT-based authentication and RBAC; authored API specs and technical documentation to support cross-functional collaboration.
- Integrated AI-powered coding tools (GitHub Copilot, Claude) to accelerate development, automate test generation, and improve code quality; used TypeScript throughout for scalable, maintainable services.
- Managed Git branching, pull requests, and CI/CD pipelines for automated deployment to AWS; participated in code reviews, mentored peers, and applied TDD principles before every production release.

Web Development Intern | **CodSoft, Remote** — Jul · Aug 2024

- Engineered responsive ReactJS components, integrated REST APIs using Axios, and managed application state with Redux Toolkit; collaborated on code reviews and Git workflows across Agile sprint cycles.

Java Programming Intern | **Shree Balaji Infotech, Lucknow** — Aug · Oct 2024

- Built Java-based utilities applying OOP, data structures, algorithms, and distributed systems concepts; documented logic and contributed to improving team engineering practices.

PROJECTS

LearnExa · AI-Powered LMS Live Demo | ReactJS · NestJS · Node.js · MySQL · TypeScript · JWT · AWS · CI/CD · AI Search

- Architected end-to-end LMS with ReactJS frontend and NestJS backend; engineered RESTful APIs, Razorpay payment integration, AI-powered smart search, JWT + RBAC auth, and deployed to AWS via CI/CD pipeline.
- Implemented dual-role system (Instructor/Student) with RBAC and JWT-protected routes, eliminating cross-role data leakage; optimised MySQL queries reducing response times and improving platform scalability.

RentHive · Rental Property Platform GitHub | ReactJS · Node.js · MySQL · JWT · OAuth2 · REST APIs · Tailwind CSS · AWS

- Designed and built scalable rental marketplace from schema to deployed API; implemented JWT + OAuth2 auth, secured 12+ protected routes with RBAC, and delivered fully responsive UI across all screen sizes.

Connexta · Real-Time Social Media App GitHub | ReactJS · Node.js · MySQL · Socket.IO · TypeScript · REST APIs · JWT

- Engineered real-time messaging with Socket.IO (sub-100ms latency); designed and documented 20+ REST API endpoints in Postman; implemented automated unit tests for all key backend modules.
