Subhajit Manna

Midnapore, West Bengal
+91-8016015785 mannasubhajit997@gmail.com Linkedin Github LeetCode

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript.
Frontend Development: HTML, CSS, ReactJS, Bootstrap, Tailwind, Redux, GSAP.
Backend Development: NodeJS, ExpressJS, WebSockets, Socket.IO, JWT.
Database: MongoDB, SQL.
Developer Tools: Git and GitHub, VS Code, IntelliJ, Figma.

EXPERIENCE

Intern at Apna College **9 August - 24 December**
Role - Teaching Assistant - MERN Stack *Remote work*

- Mentored students in mastering **MongoDB, Express.js, React, and Node.js**, helping them build scalable projects like Zoom, Airbnb, and Zerodha clones. Provided guidance on design, development, and deployment.
- Guided students in implementing real-time features with **WebRTC** and **Socket.IO**, and integrated **OpenAI API** for AI-driven functionalities, ensuring smooth project execution and timely delivery.

PROJECTS

Sanvi AI | React.js, MongoDB, Express.js, Socket.IO, JWT, Redis, Gemini AI **2024**

- Developed an AI-powered collaboration platform featuring secure, real-time group chats for developers, with role-based access control and **JWT authentication**.
- Integrated **Google Gemini AI** to automate tasks such as code generation and file creation, enhancing productivity and streamlining development workflows.
- Built a scalable backend with **Express.js**, **MongoDB**, and **Redis**, optimized for high-performance real-time operations.
- Implemented **WebContainer** to enable in-browser code execution, eliminating setup barriers and providing seamless testing capabilities.
- Designed a responsive, user-friendly interface using **React.js** and **TailwindCSS**, ensuring smooth interaction and usability for developers.

CityCab | Node.js, MongoDB, React.js, Socket.IO, GSAP, Google Maps API, JWT **2024**

- Built a complete **CityCab** app with secure user login and profile management, using JWT for authentication to ensure safe access for both users and drivers.
- Used **Google Maps API** for real-time location tracking and accurate ride suggestions, allowing users to easily find nearby rides and drivers.
- Designed easy-to-use interfaces for both riders and drivers with **React.js**, ensuring smooth navigation and a simple ride management experience.
- Created strong backend systems using **Express.js** and **MongoDB**, handling ride requests, real-time updates, and data management to make the app reliable and fast.

EDUCATION

MCC, Vidyasagar Univercity, Midnapore **2022 – 2025**
B.SC - Computer Science - ***SGPA - 8.62*** *Midnapore, West Bengal*

COURSEWORK / SKILLS

- DSA
- Oops Concepts
- Software Engineering
- Operating Systems
- Computer Network
- DBMS

HACKATHON PARTICIPATION

Reimagin Hackathon 2024 | Team Captain, Developer & Designer **August 2024**

- Led the redesign of the Microsoft Xbox webpage, developed innovative solutions, collaborated with the team, and utilized Figma and JavaScript frameworks for prototyping and front-end development.

CERTIFICATIONS

- Mastering Data Structure and Algorithms - Apna College
- Full Stcak Developer (MERN) - Apna College
