PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with hands-on experience building and deploying 3 production-ready web applications using React.js, Node.js, Express.js, MongoDB, and Redux Toolkit. Comfortable across the stack — API design, token-based authentication, AI integration (Gemini AI, LangChain, MediaPipe), and real-time features — seeking a full-stack or frontend role focused on scalable, user-facing products.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript (ES6+), TypeScript (learning), HTML5, CSS3, SCSS, Tailwind CSS, GSAP, Framer Motion
State Management:	Redux Toolkit, Context API
Backend:	Node.js, Express.js, REST API Design, JWT Authentication, bcryptjs, MVC Architecture
AI / Real-time:	Gemini AI, LangChain, LangGraph (learning), Mistral, GitHub API, MediaPipe, Socket.io
Databases:	MongoDB, Redis, PostgreSQL
Tools:	Git, GitHub, Postman, npm, VS Code, Vercel, Render

PROJECTS

RepoLens AI — AI-Powered GitHub Repository Analyzer repolens-ai-seven.vercel.app

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Gemini 2.5 Flash · Mistral · GitHub API · JWT

- Built a full-stack AI platform that analyses any GitHub repository via the GitHub API, extracting 4+ data points (metadata, file structure, README, config files) to generate structured insights.
- Integrated 2 AI models (Gemini 2.5 Flash, Mistral) to auto-generate interview questions, recruiter-style scoring across 3 evaluation dimensions (code quality, scalability, documentation), and README documentation.
- Engineered a modular architecture separating AI services, API layer, and Redux Toolkit-managed frontend state; added JWT-secured auth and a 'Roast Mode' feature delivering humorous, constructive feedback; deployed on Vercel and Render.

Affectra — AI Emotion-Based Recommendation Platform affectra-koea.onrender.com

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Redis · JWT · MediaPipe · Recharts

- Engineered real-time AI platform using MediaPipe Face Landmarker to detect 6+ facial emotion states and auto-serve personalised song/meme recommendations — eliminating manual content discovery.
- Built the backend with JWT auth and Redis-based token blacklisting for instant session invalidation; Redis caching cut repeated MongoDB queries by ~60%, improving API response speed.
- Built Recharts analytics dashboard tracking emotion trends across 5+ categories; structured global state using Redux Toolkit slices.

Sketch AI — AI-Powered Chat Platform sketch-ai-earj.onrender.com

React.js · Redux Toolkit · Node.js · Express.js · MongoDB · Gemini AI · LangChain · JWT · Socket.io

- Developed a full-stack AI chat platform integrating Gemini AI and LangChain to generate context-aware conversational responses, plus AI-powered image understanding for uploaded photos.
- Set up token-based auth using JWT with HTTP-only cookies, persistent chat history across sessions, and real-time message delivery via Socket.io.
- Optimised database operations for chat and user management; debugged and resolved 3+ production issues spanning authentication, CORS, and cookie handling on Render.

WORK EXPERIENCE

Full Stack Developer — Self-Directed Projects 2025 – Present

- Independently designed, developed, and deployed 3 full-stack web applications — UI/UX, REST API design, database modelling, JWT authentication, and cloud deployment using Git version control.

Web Developer Intern — InAmigos Foundation May 2026 (1 month)

- Contributed to frontend web development tasks and feature implementation within a team-based environment.
- Completed assigned development work across the internship duration; awarded Internship Completion Certificate.

EDUCATION

Bachelor of Science (B.Sc) in Information Technology — Ranchi University Expected 2028

Intermediate (Science) — Marwari College, Ranchi 2022 – 2024

CERTIFICATIONS

Responsive Web Design — freeCodeCamp (2026) · Generative AI and Prompt Engineering — IBM (2025) · Generative AI for All — Microsoft (2025)
