Summary

Passionate and self-motivated fresher with hands-on experience in building real-world web applications. Looking to join a collaborative team where I can apply my skills, gain industry experience, and contribute to meaningful product development.

EDUCATION

- Secondary Education – Sodepur Chandrachur Vidyapith
- Higher Secondary Education – Ushumpur Adarsha Uchcha Vidyalaya
- Bachelor of Arts (B.A.) – University of Calcutta, 2024

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS
- **Backend:** Node.js, Express.js, MongoDB, Mongoose
- **Languages:** C++, C, JavaScript
- **Tools:** MS Office, Postman, VS Code
- **Soft Skills:** Problem-Solving, Adaptability, Teamwork
- **Generative AI:** RAG (Retrieval-Augmented Generation), Vector Databases (Pinecone), Embeddings

PROJECTS

ByteLeaf - Full-Stack Coding Platform (React, Express.js, MongoDB)

- Built a coding platform inspired by LeetCode with problem creation, test cases, and code execution.
- Integrated email verification using NodeMailer, along with tag-based filtering and submission validation.
- Used Judge0 API for real-time code execution and MongoDB for persistent storage.

GitHub: https://github.com/Pallab03/ByteLeaf.git

Employee Attendance System (React.js, Node.js, Express.js, MongoDB, Tailwind CSS)

- Developed a complete employee attendance tracking system with login and signup functionality, daily check-in/check-out, and attendance logs.
- Implemented email verification, profile image upload (Cloudinary), and secure authentication.
- Integrated dynamic dashboards with filters, pagination, and real-time attendance updates.

GitHub: https://github.com/Pallab03/Employee-Attendance-Project.git

Food Delivery Website (React.js, Node.js, Express.js, MongoDB, Cloudinary, Tailwind CSS)

- Developed a full-stack food delivery platform with separate dashboards for users and restaurant owners.
- Designed the owner panel to allow restaurant owners to add, update, and delete food items with image uploads via Cloudinary.
-Integrated API endpoints for food items, restaurant data, and order handling .
-Integrated an interactive map (Leaflet) that automatically shows the user's current location and address, enhancing order accuracy.
